

Sigma Design Company Provides Engineering Analysis and Design/Build Solutions
 Industries Served: Construction, Electronics, Energy, Environmental, Food Processing,
 Research Laboratory, Marine, Pharmaceutical, and Water Processing.

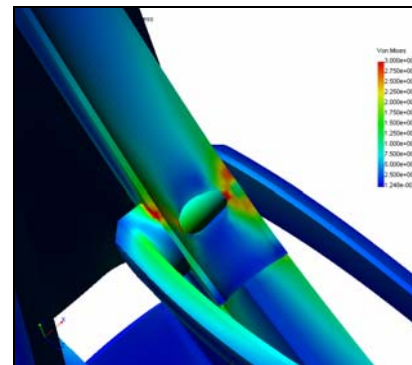

COMPLETE DESIGN PACKAGES, COMPLEX FILTRATION SYSTEMS, RENEWABLE GREEN ENERGY
 SYSTEMS, ASME PRESSURE VESSELS & PIPING, ELECTRICAL CONTROL SYSTEMS, SHOP DRAWINGS

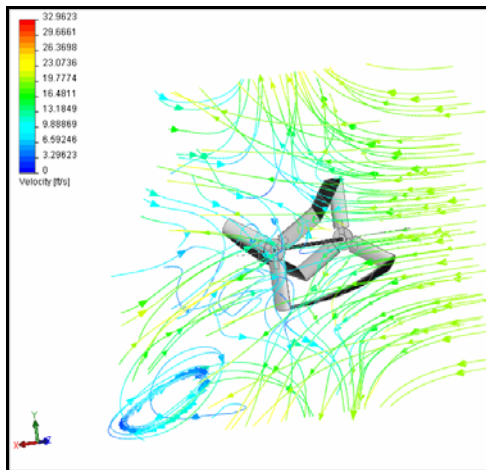

Experience:

1. Water and Environmental Wastewater Process Systems
-Specialist in Filtration & Separation Technology.
2. 3D Structural & Heat Transfer Analysis (FEA & CFD).
3. Electrical and Electronic Control Systems.
4. Computational 3D Flow Analysis: Gas & Liquid Systems.
5. Plant Engineering and Specialty Equipment Design.

Design - Build
Pump and Treat Filtration Package
 100 HP, 500 GPM @ 225 PSI.

Structural Analysis
 Of A Pin Supported, Joint Design.

Hydro-Electric Turbine Analysis
 A Renewable Green Energy Initiative
