

SIGMA DESIGN COMPANY

Turning Smart Ideas into Product Solutions

FILTRATION

Filtration Engineering, Problem Solving
and Design/Build Support

- Filtration device and media selection for solid/liquid separation
- Flow analysis and modeling
- Industrial filtration systems
- Water treatment systems
- Filter component design and commercialization
- Filter housings ASME VIII

Experienced Filtration Engineers select better filtration separation solutions and understand process limitations.

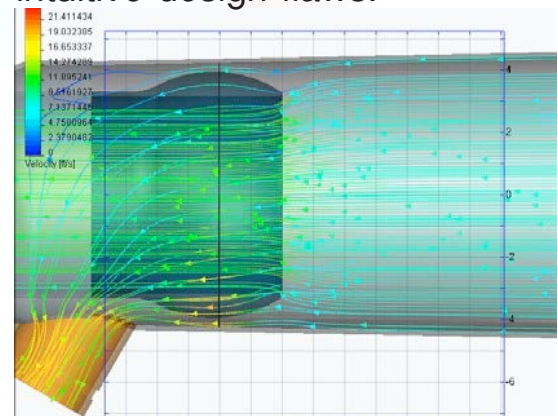

Custom developed fuel filter test stand
in accordance with ISO 4020 standards

Filtration Evaluation Test System for
U.S. NAVY Desalination Program

Advanced Design Tools and 3D
visualization of fluid flow profiles
uncover non-obvious, counter
intuitive design flaws.

Experienced Filtration Designers
provide OEM's with Manufacturing
Friendly Designs = Lower
Production Costs.
