

SIGMA DESIGN COMPANY

Turning Smart Ideas into Product Solutions

3D RAPID PROTOTYPE

Sigma Design is ready to:

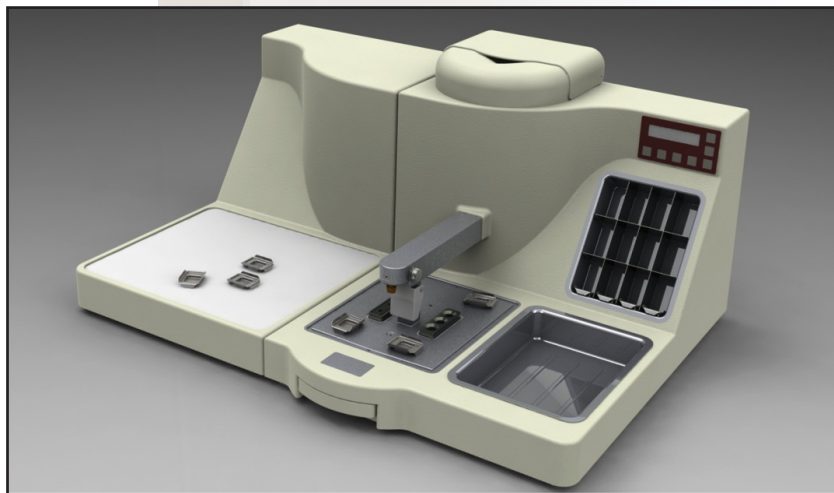

- Take your geometry and produce prototypes.
- Design new geometry and produce prototypes.
- Develop and manufacture prototype devices, specialty production equipment and controls with testing capabilities in-house.

SPYDER 3 Display Calibration for Professional Photographers and Studios

3D Rapid Prototype of Spyder 3 designed and made *IN HOUSE* at Sigma Design

This tissue embedder Cryo Unit was designed and fabricated *IN HOUSE* by Sigma Design.

Sigma provides in house 3D rapid prototyping services for proof of concept review. With our Rapid Prototyping FDM machines we can take your design concepts and grow ABS plastic parts. Used as a quick, proof of concept development tool, parts can be created, manufactured and shipped in Two Days.
