

SIGMA DESIGN COMPANY

Turning Smart Ideas into Product Solutions

NEW PRODUCT DEVELOPMENT

Creative design solutions for the development of new products

- Visualization to help differentiate, create uniqueness, and increase a product's buy appeal.
- Frequent design reviews and fast-paced refinement to reduce development time.
- Advanced engineering analysis to uncover non-obvious design flaws early-on.
- Manufacturing-friendly designs to lower production costs.

Teeth Whitening Head-unit & Molded Mouthpiece

IPad 2 Accessories

Sigma Design specializes in the commercialization of technology.

Sigma skills include: idea creation, *human factors, concept development, engineering analysis, material selection, complex mechanism development and Rapid Prototypes

* We often work with Industrial Designers to coordinate the Human Factors needs and Industrial Design prior to beginning detail design work. One of the groups we work closely with is Gordon Randall Perry Design in New York City:
